

题目

BrC1=CC(COC/C=C(C)C)=CC=C1>LDA (1.1eq), THF, R.T.>[A], 其中 *LDA* 为二异丙基氨基锂, *THF* 为四氢呋喃

请选择该反应的主产物A

A.

CC(C1COCC2=CC=CC=C21)=C

B.

C/C(C)=C1COCC2=CC=CC=C2/1

C.

CC(C)C1=COCC2=CC=CC=C21

D.

BrC1=CC(CO)=CC=C1

E.

BrC1=CC=CC(C(C(C)(C=C)C)O)=C1

F.

CC1(C)C2=CC=CC=C2COC=C1.C.C

答案

正确答案: **E**

详细解析

苯环上没有强吸电子基团作用，难以形成苯炔中间体。

CHECKPOINT

1 PTS

苯环上没有强吸电子基团作用，难以形成苯炔中间体

底物酸性最强的位点是苄位上的质子，因此因此 *LDA* 攫取苄位上的质子，首先形成碳负离子中间体：

BrC1=CC([CH-]OC/C=C(C)C)=CC=C1

CHECKPOINT

1 PTS

LDA 攫取苳位上的质子，首先形成碳负离子中间体

接着发生一步[2,3]-Wittig重排得到最终产物E

CHECKPOINT

1 PTS

接着发生一步[2,3]-Wittig重排得到最终产物E
